PROJECTS

Internship Management System (CRUD Application)

2024 – 2025

Frontend Developer | React.js, JavaScript, HTML, CSS

GitHub: https://github.com/devaprasath-k/Crud_Projects

- Developed a React-based CRUD application to manage internship records, enabling users to create, read, update, and delete entries through a structured, component-driven interface.
- Built reusable React components and managed application state to handle dynamic data rendering and form interactions efficiently.
- Structured the project using modular JavaScript files (App.js, Crud.js, index.js) to separate UI logic from core CRUD functionality, improving code readability and maintainability.
- Styled the application with custom CSS to deliver a clean, responsive layout consistent across screen sizes.

Rentomojo – Items CRUD Application

2024 – 2025

Full-Stack Developer | React.js, MongoDB, Express.js, Node.js

GitHub: <https://github.com/devaprasath-k/Rentomojo>

- Built an items-based CRUD web application inspired by rental-marketplace platforms, allowing users to add, view, update, and delete item listings.
- Organized the project into dedicated UI/UX folders (crud_ux, crude_ui) to separate interface design iterations from core application logic.
- Implemented JavaScript-driven CRUD logic to manage item data dynamically on the client side without page reloads.
- Focused on clean, intuitive UI design to simulate a real-world product listing and management experience.
